

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has increased our quiet time at home considerably. 1st the phone doesn't ring every 1/2 hour and we don't get all tied up in knots being mad that it is ringing all evening. I get tired of being nice when I'm really angry.

Indiana's law has been very effective. I used to 6-8 calls per evening, now I only receive none. We noticed the difference immediately. It was like night and day. We are both much more relaxed at night and feel like we aren't being intruded upon any more.

Indiana's law is very important to our family.--Please don't mess with it.
